to me, Claudio

Hi Paul,

We just received in the last 24 hours a copy of the generic geotechnical report for the geologist that was initially engaged via the Shire to report on the Landslip and an independent Geotech report has also been received from the owner of 10-12 View Point Road, however a peer review is pending at this stage.

I am unable to provide any copies of these reports due to privacy/legal reasons at this point in time, the review of the reports is currently being undertaken from various Officers/Departments within the Shire at the moment and until we are told otherwise that the reports can be released I will let you know.

Regards
