**Subject:** Peer review : Macrae Landslip ( other issues)

Good afternoon Claudio

Very happy to hear from Benjamin today that the peer review of 3 stage plan prepared by Geo Tech company employed by owners 10/12 View Point Road should be completed today.

A: who is the Geo Tech group used by the owners.  
You may have advised before but could you confirm again.

B: we assumed the detail of the plan : drawings etc would have been part of the review.  
They must be available now.

C: please confirm again that Cardno are the shire Geo tech contractor.

D: please confirm how many inspections: tests : reviews there have been.

We understand the shire inspects the site on a regular basis: the attached photo shows a significant wet area around and underneath the platform at the top of the slope. It's been there for a while now.

Please when time permits provide the info we need :  
this information is being requested by our neighbours affected directly or indirectly .

Paul Willigenburg
