to me, John, jon

Finally some good news!!! The drainage is getting sorted, I have a sense from reading below that they feel it has certainly contributed to the slide and hence the immediate response.

A person from the drainage team rang me last week to say he would pump out the drains up there but he felt that there was a bigger problem with an underground spring perhaps changing the flow of the water where the new house was being built in Prospect Hill Road, and he confirmed that the guttering etc was in need of repair and was talking to engineering about it.

It's a start, let's hope everything improves from here on in

All the best Ben

Subject: Penny Lane/View Point Drainage Issues

Hi Ben,

Emailing you in regards to your drainage case at 3 Penny lane, in particular water coming off View Point Road.

I'm happy to advise drainage works, including installation of new pits and pipes and renewal of the kerb, are commencing very shortly.

We are currently awaiting material which should be arriving any day now and we are looking to commence right away.

The landslip issue is definitely a complicated one but the drainage works should definitely help resolve some of the overland flow issues off the infrastructure.

Hopefully this provides some reassurance and you will be seeing these works shortly.

Kind regards,

BT
