Zone	South East Water ► Parkes St Tank Zone
Leak Asset Type	investigation
Flow Rate (L/min)	2
Has the leak been called in by DS Technician?	No
Leak Visible	Yes

Comments

Noticed consistent flow of water across driveway 3, running across gravel road(Somers cl) & into gutter along Somers av

Chased water to pvc pipe behind letterbox & lost sight of it.

No noise on meter 3

Plan shows 2x valves after hydrant which I could not locate, suspect it has been buried/taken over by garden beds.

One valve feeds dead end pvc main Sussopedly next to sewer manhole cover...could not locate & other valve heads downhill on Somers av

Not sure Wether this is rainwater from recent rain, overflow water from watertank or leak on main somewhere. Suggest locating & exposing these 2 valves & sounding for leaks

Difficulty locating meters along Somers cl. Could not locate some meters

14/5

Water still flowing. No rain for several days.

Went to the very top to cook st to eliminate any possible customer leaks...found none....

...although did notice that scour/overflow drain next to access driveway to watertank 90% full of water, but not flowing
