Comments

Arrived onsite, no one home. Meter spinning around, sounded garden tap at front of unit 3, no noise.

Called **I&S** . **I&S** Arrived gained access to rear of property, sounded rear garden tap, picked up small noise. Tightened tap & noise stopped. Sounded fittings up sideways..no other noises.

Checked meter again & meter stopped spinning...no noise.

Informed **I&S** of my findings & that rear garden tap may have been used & not turned off fully/left o g for a long period of time .
