CUSTOMER INFORMATION

Prescribed Electrical Installation Work

In a domestic situation, this covers all work done on wiring and equipment where you cannot switch off the electricity. This generally means work on wires up to the switchboard and may include the wiring from the street to the house/building and the electricity meter.

Non-Prescribed Electrical Installation Work

In a domestic situation, this covers all work done on wiring where you can switch off the electricity at the switchboard. For example, installation or maintenance of safety switches, circuit breakers, power points, non-plug in electrical equipment or lighting points within the house.

Please note: Your installation may be subject to audit by representatives of the Office of the Chief Electrical Inspector.

Office of the Chief Electrical Inspector

email: info@ocei.vic.gov.au

TYPES OF NON-PRESCRIBED ELECTRICAL INSTALLATION WORK

All work **other** than that listed below is non-prescribed work.

TYPES OF PRESCRIBED ELECTRICAL INSTALLATION WORK

For the purposes of section 45 of the Electricity Safety Act 1998, **prescribed electrical installation work** means work on all or part of any of the following electrical installations if they are ordinarily operated at low voltage or a voltage exceeding low voltage –

- 1 A consumers mains, main earthing system and those parts of a main switchboard related to the control of the installation and protection against spread of fire.
- 2 A sub-main, earthing system and any distribution board related to the control of an individual occupier's portion of a multiple installation unless the occupier has immediate and unimpeded access to the main switch or switches controlling the whole of the multiple installation.
- 3 Electrical wiring and electrical equipment in hazardous areas within the meaning of Section 9.0 of the SAA Wiring Rules and protection equipment associated with hazardous areas.
- 4 A high voltage installation except high voltage wiring and equipment –
 - (i) associated with an electric discharge lighting system; or
 - (ii) associated with X-ray equipment; or
 - (iii) associated with high frequency equipment; or
 - (iv) within self contained equipment supplied at low voltage.
- 5 Control and protection equipment associated with standby generation or co-generation electricity supply systems.
- 6 An electric fence used for security purposes but not including an electric fence intended primarily for the control or containment of animals.
- 7 An electrical installation comprising remote area power supplies with a power rating exceeding 500 volt amperes not connected to a supply authority distribution system.
- 8 Electrical wiring and associated fixed electrical equipment installed in body-protected or cardiac-protected electrical areas of hospitals and medical and dental practices.

Postcode Authorized signatory

CONDITIONS AND LIMITATIONS

- 1 This certificate warrants that the treatment to protect the building described overleaf has been performed in compliance with AS 3660.
- 2 With chemical soil treatments property owners should be aware that action by the occupiers of the building, or others, may reduce the effectiveness of the protective barrier by any of the following:
 - (a) Breaching of the barrier may occur if the soil next to the substructure is physically disturbed (by gardening, drainage work or by the activities of burrowing animals).
 - (b) Bridging of the barrier may occur by appendages being attached to the building after treatment. Such appendages include carports, annexes, trellises, steps, fences and raised garden beds in contact with exterior walls.
 - (c) Offcuts and formwork left on site, or materials stored under or against the building may also bridge the barrier.
 - (d) Poor ventilation or damp conditions can be attractive to termites and may lead to increased activity in the subfloor area, increasing the risk of infestation.
- 3 Although the chemical soil barrier system provides significant protection for many years if undisturbed, regular competent inspection is recommended.

Additional treatment is only required when bridging or breaching has occurred.

Where the activities in Items 2(a) or 2(b) above have occurred or are planned then such activities should be referred to a licensed pest control firm for appropriate advice and treatment.

CONDITIONS AND LIMITATIONS

- 1 The completion of this certificate does not in itself certify that the building described overleaf has been treated in compliance with AS 3660.

A certificate of completion referring to this termiticide application must be provided by the authorized applicator when the treatment for prevention of termite infestation by chemical methods has been completed.

- 2 With pre-construction treatments it is the responsibility of the builder/owner to ensure that the site is properly prepared before the application is commenced. The treatment should not be undertaken until the following conditions are met:

- (a) All roots exposed during excavation, tree stumps, logs and timber removed from the area to be treated.
- (b) All offcuts and other debris removed from the area to be treated.
- (c) All cuttings, trenches and excavations completed and all pipes, wastes and conduits in position.
- (d) All grading completed and any fill in place, levelled and compacted.

BUILDING WORK DIRECTION

Issued in accordance with Section 37
of the Building Act 1993

Issued to:

Owner:	F DIMOPOULOS, V DIMOPOULOS 3 Penny Lane MCCRAE VIC 3938
--------	---------------------------------------------------------------

Property Address:

Lot 4 PS 348585 Vol 10283 Fol 265	3 Penny Lane MCCRAE VIC 3938
-----------------------------------	------------------------------

Nature of works:

Dwelling Additions	Building Permit	B1001/03
--------------------	-----------------	----------

Date of Inspection:	27/05/2003	Date of Direction:	28/05/2003
---------------------	------------	--------------------	------------

Inspection carried out;

Site Pre-slab Slab steel Frame **Final**

Rectification works required:

<i>1. No top plate to stud tie downs have been provided to the East wall of the sunroom</i>
<i>2. Provide non slip treads to internal stairs</i>
<i>3. Provide a solid handrail and droppers at 900mm ctr's as per wire specification (internal stairs)</i>
<i>4. Provide safety glass beside the ensuite shower</i>
<i>5. Provide smoke detectors as per plans</i>
<i>6. Provide stat deck stating that insulation was installed as per plan</i>
<i>7. Provide complying stairs up into the store room</i>
<i>8. Provide a Termite certificate</i>
<i>9. Provide Plumbing certificates</i>

Re-inspection, Required/ *Prior to continuation of works.*

Explanation of Notes referred to on page 1

Note 1 Building practitioner means:-

- (a) a building surveyor; or
- (b) a building inspector; or
- (c) a quantity surveyor; or
- (d) an engineer engaged in the building industry; or
- (e) a draftsman who carries on a business of preparing plans for building work or preparing documentation relating to permits and permit applications; or
- (f) a builder including a domestic builder; or
- (g) a person who erects or supervises the erection of prescribed temporary structures; or
- (h) a person responsible for a building project or any stage of a building project and who belongs to a class of people prescribed to be building practitioners.

but does not include:-

- (I) an architect except in Part 9 and sections 24(3) and 176(6); or
- (j) a person (other than a domestic builder) who does not carry on the business of building.

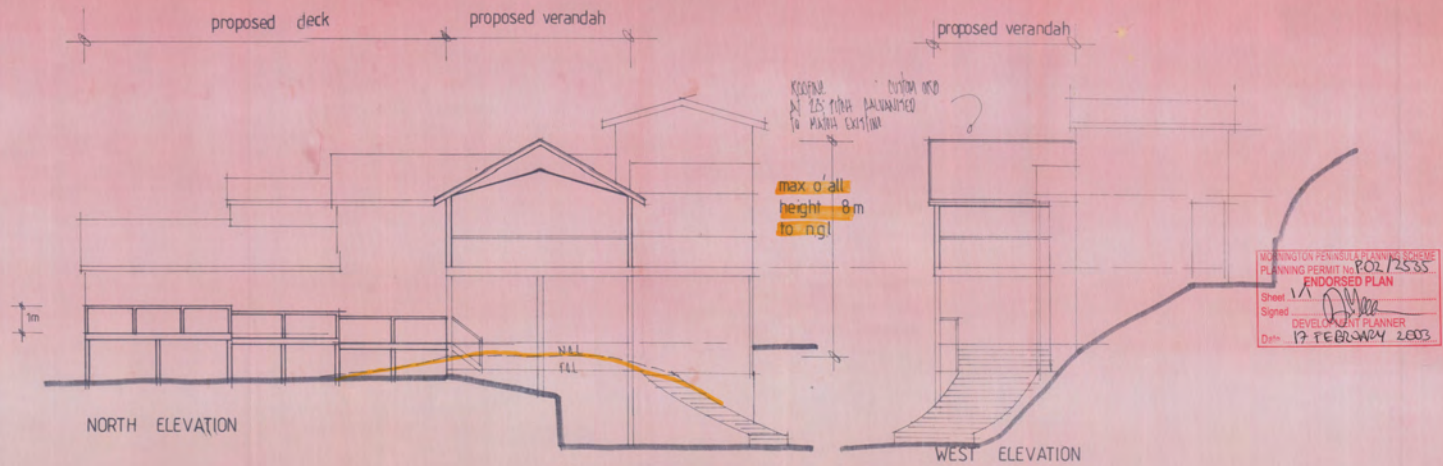

Note 2 include building practitioners with continuing involvement in the building work

Note 3 Include only building practitioners with no further involvement in the building work

Note 4 The use of the building may also be subject to additional requirements under other legislation such as the **Liquor Control Reform Act 1998** and the dangerous **Goods Act 1985**

Note 5 If an owner builder restrictions on the sale of the property apply under section 137B of the Act. Section 137B also prohibits an owner builder of domestic building work from selling the building within 6½ years from the date of completion of the relevant works unless they have satisfied certain requirements including obtaining compulsory insurance. The Building Control Commission maintains a current list of domestic building insurance providers.

CHIMNEY

Dear Sir

DECK LEOA.

RE: 3 PENNY LANE, MCCRAE – BA 981848

I refer to your submission of amended plans received on 14/3//03 detailing the proposed amendments to the dwelling and the submission of the survey undertaken by Watson P/L and received on 18/3//03 for the above site and advise as follows.

I am willing to issue a new building permit for the building work still to be undertaken being-

1. Framing items

- Bearer ends and joins to be supported in the store & steps ✓
- Tie top plates to studs/studs to sub-floor — PETER
- Provide tie downs to RB2/RB4 & RB5 as per engineering computations (page B) N/A
- Nail ply bracing @ 50 mm centres top & bottom — PETER
- Amend all plans to show wall and window positions (submitted 24/2/03) ✓
- Block under studs RB1 & RB2

2. Building work

- Completion of the timber decking adjacent to the entry, bedroom and retreat

3.

- Submission of the computations for the glazed balustrading including computations, from the manufacturer
- It would appear that the columns known as DC3 & DC5 exceed the design length of 6.9 metres considerably and amended engineering computations (with Form 13) will need to be submitted confirming their adequacy prior to the issue of the Occupancy permit

TIES + TRUSSED
OK

The existing roofed area over the decking adjacent to the living room cannot be issued with a building permit as the work has been completed. You must expose all framing members and connections to enable inspection to be undertaken to ensure that compliance with the submitted engineering drawings is achieved.

Furthermore, from the survey submitted it is evident that portion of the entry stairs and retaining wall (masonry) have been constructed on the adjoining allotment. You are required to submit amended plans detailing the removal of all structures over the title boundary and proposed new replacement structures. The existing timber sleeper retaining wall may remain on the adjoining property provided written consent is received from the owner of the allotment agreeing to the current siting.

If you have any queries in regard to this matter please do not hesitate to contact me on (03) 5986 0160.

Yours faithfully,

Personal Information

27 February, 2003

Mr F Dimopoulos
3 Penny Lane
McCRAE 3938

Dear Sir

RE: 3 PENNY LANE, MCCRAE – BA 981848

I refer to your recent submission of amended plans detailing a proposed roofed area to an existing timber deck and the construction of an additional deck adjacent to the entry, bedroom and retreat at the above site and advise as follows.

As the existing permit was issued on 11 August 1998 with an extension issued on 26 March 2001 to lapse on 26 March 2002, your Building Permit has now lapsed. In accordance with the Building Regulations 1994, (the "Regulations") Regulation 2.8(4). I am unable to extend the Building permit. There exists two (2) alternatives to bring the above project back on track being –

1. Apply for a modification to the Building Appeals Board to allow me to extend a lapsed permit in accordance with Regulation 2.8(4)
2. Apply for a new building permit detailing all outstanding building work. This will require the completion of a new Form 1 (encl), all relevant documentation and fees as applicable

Perusal of the Building permit file reveals that the frame inspection undertaken on 15 February 2000 required the rectification of 6 items that are still outstanding as of today's date-

1. Bearer ends and joins to be supported in the store & steps
2. Tie top plates to studs/studs to sub-floor
3. Provide tie downs to RB2/RB4 & RB5 as per engineering computations (page B)
4. Nail ply bracing @ 50 mm centres top & bottom
5. Amend all plans to show wall and window positions (submitted 24/2/03)
6. Block under studs RB1 & RB2

In accordance with the Building Act 1993, (the "Act") Section 16, a Building Permit is required for all building work prior to that work commencing. As the deck is currently partially constructed and the roof completed over the existing deck, I am unable to issue a Building Permit for this work. Stiff penalties apply to owners that undertake building work without the issue of a Building Permit and as such you will be required to expose all framing/structural members. The above building work will be the subject of a Building Notice served in accordance with Part 8 of the Act that will be served on you in due course.

Furthermore, following a site inspection on 25 February 2003 it appears that portion of the steps and masonry/timber retaining walls have been constructed over the northwestern title boundary of the allotment into either or both the adjoining allotment or the road reserve. In order to clarify this situation you are required to provide a survey undertaken by a Licensed Land surveyor plotting the exact locations of the above mentioned structures. Further action may be taken depending on the results of the survey.

If you have any queries in regard to this matter please do not hesitate to contact me on (03) 5986 0160.

Yours faithfully,

Personal Information

Mr F Dimopolous
3 Penny Lane
McCRAE 3939

RE: 3 PENNY LANE McCRAE

I refer to your request for an extension of time for Building Approval 981848 which approves the construction of a new dwelling at the above address.

I agree to extend the period within which the works approved by the permit are required to be completed by twelve (12) months to then March 26, 2002

You are requested to make every effort to complete the works within this period, as further renewals may not be an option. As such a new building permit would need to be taken out.

Yours faithfully

Personal Information

MARCH 20, 2001

MR F DIMOPOLOUS
3 PENNY LANE
McCRAE. 3939

Dear Sir, Madam

**RE: - 3 PENNY LANE McCRAE
BUILDING PERMIT 981848**

I refer to the above building permit which approved the construction of a dwelling on the above-mentioned property. A check of our records indicated the building permit and planning permit has lapsed.

As it is illegal to carry out building works without a current permit you are required to extend your building permit for a further 12 months and pay a fee of \$ 315.00.

You are required to apply for a new planning permit.

If no response to this letter is received within 14 days, the building permit will be deemed to be expired and as such, any further action with respect to these works will require a new application for a Building Permit to be submitted to Council.

Enclosed is a copy of last Frame inspection carried out on:- 15/2/00 which was not approved.

Please do not hesitate to contact me if you have any queries, or further information is required Phone 59860192.

ROSEBUD VIC 3939

Att: Mr. Peter Phillips

Dear Sir,

RE: 3 PENNY LANE, McCRAE – BA 981848

Further to our telephone conversation today, please find enclosed copy of Structural Calculations and Form 13 Structural Certification for the existing balustrades to the balconies at the above residence. The existing balustrades are structurally adequate.

I also wish to confirm the I have measured the tallest column, DC3, supporting the main deck, and found it to be 6400 mm high to the underside of the deck beam. This is less than the original design height of 6900 mm.

I trust that the above information satisfies your requirements in relation to the above matters.

Yours Faithfully,

Personal Information

Proposed Alt and Addit to Residence

3 Penny Lane, McCrae

31st March, 2003

PROPOSED RESIDENCE
3 PENNY LANE,
MCCRAE

Sheet No.: 1
Job No.: 13/2003
Date: 31.3.03
Eng: A.P.

BAULSTRADE TO DECK:

TOP HANDRAIL:

Span: 7100 mm \leq (Max.)

$$M_{DIST}^{HORIZ.} = 0.35 \times 7.10^2 / 8 = 2.21 \text{ kN.m}$$

$$M_{CONC.}^{HORIZ.} = 0.60 \times 7.10 / 4 = 1.07 \text{ kN.m}$$

For Existing 76.1 x 3.6 CHS. Top Handrail:

$$F_b = 2.21 \times 10^3 / 14.2 = 155.6 \text{ MPa}$$

$$F_b = 0.66 \times 250 = 165 \text{ MPa} \quad \checkmark \text{ ok}$$

EXISTING 76.1 x 3.6 CHS HOT DIP GALVANISED TOP HANDRAIL IS ADEQUATE.

GLASS INFILL PANELS:

Vertical Span: 1000 mm

- Spanning Vertically (Supported Along Top and Bottom Edges)

$$M_{DIST.}^{VERT.} = (0.50 \times 1.00) \times 1.00^2 / 8 = 0.062 \text{ kN.m/m}$$

$$M_{CONC.}^{VERT.} = 0.25 \times 1.00 / 4 = 0.063 \text{ kN.m} \quad (\text{Conc. Load over } 0.01 \text{ m}^2)$$

For Existing 8 mm Toughened Glass:

For 0.01 m^2 Conc. Load @ Midspan (i.e. 100mm x 100mm)

$$\text{Eff. Width} = 100 + (1.20 \times 500) = 700 \text{ mm}$$

$$\therefore Z_{min} = 1/6 \times 700 \times 7.70^2 = 6917.16 \text{ mm}^3$$

$$\therefore f_b = 0.063 \times 10^6 / 6917.16 = 9.11 \text{ MPa}$$

For 8mm Toughened Glass: $F_b = 2.50 \times 15.2 = 38.0 \text{ MPa} \quad \checkmark \text{ ok}$

EXISTING 8.00 mm TOUGHENED GLASS INFILL PANELS TO BALKONSTRADES ARE ADEQUATE.

Sheet No. 26

Job No. 131/98

Date 26.11.98

Engr. AP

Project:

Reinforced Masonry Retaining Wall:

$$\gamma = 20 \text{ kN/m}^3$$

$$K_a = 0.406 \quad K_p = 3.50$$

No Surcharge Loading

Max. Height of Soil Retained : 2900 mm

Wall:

$$M^* = (0.406 \times 20 \times 2.90^3 / 6) \times 1.50 = 49.51 \text{ kN.m}$$

For 400 Reinforced Blockwork Wall
Solid Blocks

$$416 \text{ Starter Bars @ 200 Centres (150 mm From Rear Face)} \\ (A_{st} = 1000 \text{ mm}^2/\text{m}) \quad \therefore d = 400 - 150 = 250 \text{ mm.}$$

$$\therefore M_d = 0.70 \times 400 \times 1000 \times 250 \left(1 - \frac{0.60 \times 400 \times 1000}{(1.30 \times 5.40) \times 1000 \times 250} \right) \times 10^{-6} \\ = 60.43 \text{ kN.m/m} \quad \checkmark \text{ ok.}$$

Footing:

- olt About Toe - 400 Deep Footing.

$$M_{olt} = 0.406 \times 20 \times 3.30^3 / 6 = 48.63 \text{ kN.m/m}$$

$$\text{Revd. Resistance} = 1.55 \times 48.63 = 91.43 \text{ kN.m}$$

Try 1900 wide x 400 Deep Footing:

Avail. Resistance:

Ret. Wall	DL	$23 \times 0.18 \times 2.90$	$= 12.01 \text{ kN/m}$
Ret. Wall	DL	$24 \times 0.22 \times 2.90$	$= 15.31 \text{ kN/m}$
Footing	DL	$24 \times 0.40 \times 1.90$	$= 18.24 \text{ kN/m}$
Soil	DL	$20 \times 0.30 \times 2.90$	$= 17.40 \text{ kN/m}$
Key	DL	$24 \times 0.30 \times 0.20$	$= 1.44 \text{ kN/m}$

2/360 main street
morningside 3931

phone (03) 5975 5100
fax (03) 5975 9564

Project:

Reinforced Masonry Retaining Wall: (Cont)

$$\begin{aligned}
 M_{resist} &= (12.01 + 15.31) \times 1.40 + (18.24 \times 1.90/2) \\
 &\quad + (17.40 \times 1.75) + (1.44 \times 1.40) \\
 &= 38.25 + 17.33 + 30.45 + 2.02 \\
 &= 88.05 \text{ kNm/m} \quad \text{Accept.} \\
 (F/s &= 1.91)
 \end{aligned}$$

Sliding:

$$P_{sliding} = 0.406 \times 20 \times 2.90^2 / 2 = 34.14 \text{ kNm/m}$$

Try 600 Key

$$\begin{aligned}
 P_{resist} &= (64.40 \times 0.45) + (3.50 \times 20 \times 1.20^2 / 2) \\
 &= 28.98 + 58.51 \\
 &= 87.49 \text{ kNm/m}
 \end{aligned}$$

$$F/s = 87.49 / 34.14 = 2.56 \quad \text{OK}$$

Footing Reinforcement:

$$D = 400 \text{ mm} \quad d = 400 - 50 - 12 = 338 \text{ mm}$$

$$\begin{aligned}
 A_{st} \text{ Reqd.} &= 49.51 \times 10^6 / 0.80 \times 450 \times 0.9 \times 338 = 452 \text{ mm}^2/\text{m} \\
 a &= 452 \times 450 / 0.85 \times 1000 \times 20 = 11.97 \text{ mm} \\
 \therefore A_{st} \text{ Reqd.} &= 49.51 \times 10^6 / 0.80 \times 450 \times (338 - 11.97/2) = 444 \text{ mm}^2/\text{m} \\
 \Rightarrow \text{F8 @ Bottom} \quad (A_{st} &= 503 \text{ mm}^2/\text{m}) \quad \text{OK}
 \end{aligned}$$

MC CRAE 3938

Dear Sir /Madam

RE: BUILDING APPLICATION NO : 981848

Your application for building approval for a proposed Additions to be constructed at 3 Penny Lane McCrae has been considered. Building approval cannot be issued at this stage as further information as detailed below is required.

1. Pay the balance of the fees:

Building Fee
Government Levy
Lodgement Fee

Irrelevant & Sensitive

Total

~~2. Submit a Home Owners Warranty registration certificate~~

~~3. Submit a certified copy of title~~

~~4. Submit three copies of Engineers drawings and computations~~

~~5. Submit copy of Form 13 Certificate of Compliance for proposed Engineer's plans and computations~~

6. Submit three copies of truss details including truss layout *

7. The Council's Development Planning Section, Mornington Office, has advised that a planning permit is required. Please find enclosed relevant application form (**enclosed**) *Anthony Matthews*
P 801/98 /smed 29/7/98.

~~8. Submit three copies of the soil report~~

9. A cut off drain is required to all site excavations and connected via a silt pit to the stormwater drains *

~~10. Nominate the builder on the building application form~~

~~11. Provide engineers designs for tie downs, bracing etc~~

~~12. Provide engineers design for support of sunroom addition this is to include footings and columns.~~

13. Building fee allows for three inspections – any further inspections will be charged at \$ 35.00 each

14. Provide handrails and balusters to entry stairs *

29/6-98 Frank Redwood

Please submit the above information to enable a final check of your application and the issue of a Building Permit.

Building approval cannot be granted until all items are submitted and satisfy the requirements of the Regulations.

If you have any further queries, please contact Bob Helmich on (59 772407)
Yours faithfully

Explanation of Notes referred to on page 1

Note 1 Building practitioner means:

- (a) a building surveyor; or
- (b) a building inspector; or
- (c) a quantity surveyor; or
- (d) an engineer engaged in the building industry; or
- (e) a draftsman who carries on a business or preparing plans for building work or preparing documentation relating to permits and permit applications; or
- (f) a builder including a domestic builder; or
- (g) a person who erects or supervises the erection of prescribed temporary structures; or
- (h) a person responsible for a building project or any stage of a building project and who belongs to a class of people prescribed to be building practitioners.

But does not include:-

- (i) an architect except in Part 9 and sections 24(3) and 176(6); or
- (j) a person (other than a domestic builder) who does not carry on the business of building; or

Note 2 include building practitioners with continuing involvement in the building work

Note 3 include only building practitioners with no further involvement in the building work

Note 4 if an owner builder restriction on the sale of the property applies under section 137B of the Act. Section 137B also prohibits an owner builder of domestic building work from selling the building within 6½ years from the date of completion of the relevant works unless they have satisfied certain requirements including obtaining compulsory insurance. The Building Control Commission maintains a current list of domestic building insurance providers.

Note 5 Building permit levy

Notice is hereby given that in accordance with section 201 of the Act, a building permit levy is required to be paid to the Building Administration Fund (to be collected by the relevant building surveyor) prior to the issue of the building permit. The basis for calculation of that fee is 0.064 cents in every dollar of the cost of the building work for which the permit is sought.

REPORT No. : RM0997-98

CLIENT : Frank Dimopoulos
3 Penny Lane
McCRAE 3938

PROJECT : 3 Penny Lane McCRAE

PROPOSAL : It is proposed to construct single and/or double storey timber extensions to the existing dwelling on strip footings and stumps at this site.

1. COMMISSION:

Investigation for site classification (Australian Standard 2870-1996 Residential Slabs and Footings), recommend a founding depth and/or foundation treatment where appropriate.

2. SITE GEOLOGY:

Geological maps of the area suggest that the site is in an area of Devonian Granodiorite and Granite - CLAYS. The site investigation confirmed this.

3. SITE TOPOGRAPHY:

The site has a steep to moderate slope down to the north. The ground cover comprises of native trees and concrete paving.

4. INVESTIGATION:

Four bores were drilled by mechanical and hand auger at the approximate locations shown on the attached plan.

Soil strengths of the cohesive soils were tested (if considered appropriate) by using a shear vane apparatus and observed densities of non-cohesive soils were noted.

The logs of each bore are attached showing the soil descriptions and depths along with any cohesive strengths measured and observed densities on non-cohesive soils.

5. FINDINGS:

The bore holes revealed that the existing soil profile consists of various layers of SAND FILL overlying a naturally occurring dark brown silty SAND and dark grey-grey coarse silty SAND. This is followed by various layers of coarse silty SAND.

6. SITE CLASSIFICATION:

After considering the area geology, the soil profile encountered in the bores and the proposed superstructure, this site has been classified as CLASS P with respect to foundation construction (Australian Standard 2870-1996 Residential Slabs and Footings). It is anticipated that the seasonal surface movement at this site will not exceed 20mm.

7. RECOMMENDED FOUNDATION FOR STUMPS AND OR STRIP FOOTINGS:

Although classified as CLASS P the use of CLASS S (AS 2870-1996) proportioned strip footings and stumps founded at minimum depths of 500mm and 400mm respectively, below the finished surface level surrounding the structure is recommended. However, the founding depth must be at least 100mm into any of the naturally occurring SANDS as described in the logs of boring, which from the site investigation can be assumed to have an allowable bearing capacity of 150kPa at this depth.

As a guide to the founding depths with regard to the above and information obtained from the bores, the founding depth at this site will be approximately up to 950mm for strip footings and up to 950mm for stumps in relationship to the existing surface where this surface is to be the finished surface level surrounding the structure.

It is recommended that where any footings are to be constructed next to the existing underground services (sewers etc.), then these footings should be founded at a depth above the invert of the service at an angle of repose of 45° for CLAYS and 30° for SANDS, unless special consideration has been given to the founding material.

7.1 Retaining Wall Parameters:

All proposed retaining walls must be engineer designed incorporating the following parameters:

- i) Bulk density of existing sand 2.0 ton/m³
- ii) Internal friction angle of 25°
- iii) Ka, active earth pressure, value of 0.406

Due to the nature and composition of the soil profile found in the site, construction during or after wet weather may be difficult. Therefore, it is recommended that an open cut drain be constructed around the proposed site to a depth of not less than 300mm below the site foundation material, or CLAY, whichever occurs first to intercept any ground water. There is no need to maintain this drain after construction to ground level has been reached. At this stage the drain should be backfilled, failure to do so may have detrimental effects.

8. CONDITIONS OF THE RECOMMENDATION:

- 8.1 The recommendations made in this report may need to be reviewed should any site works disturb any soil 300mm below the founding depth of the structure.
- 8.2 Since the soil horizons and layers can vary in depth and thickness over the site, the depths and bearing capacities given above are given as a guide only. If the footings are founded at the minimum depth, as stated and are in the soil as described in the logs of boring for this site, then the requirements of this report have been met.
- 8.3 Where any filling is to be placed the footing founding depths recommended in this report will need to be increased accordingly by the depth of that fill.

Unless one of the following occurs:-

- 8.3.1. The base of the footing is founded in the founding soil recommended in 7.1.
- 8.3.2. The fill has been placed under controlled conditions and compacted to a minimum of 95% of AS 1289, 5.1.1 (Standard Compaction) throughout. In this case the footings may be placed in this fill depending on the findings of further site investigations and the revision of the recommendations made in this report.

- 8.4 The descriptions of the soils found in the bore holes closely follow those outlined in AS 1726-1993 (Geotechnical Site Investigations). Colour descriptions can vary with soil moisture content. It should be noted therefore, colour and shade descriptions mentioned in this report are made when the soil is in a moist condition.
- 8.5 This report has been compiled and recommendations made based on the information supplied in the brief to Civiltest Pty Ltd and from the field investigations and observations made including the extent of if any site filling. Every care has been taken within the terms of the brief to ensure that the field investigation is representative of the site. Therefore, if it is found that for any reason information received by Civiltest Pty Ltd is incorrect or conditions on site vary considerably during construction to those described in this report then the comments and recommendations made in this report may need to be amended.
- 8.6 To ensure acceptable performance of the footing systems recommended in this report, care should be taken that the fundamental building, landscaping and long term maintenance procedures are adhered to as set out in the CSIRO Information Sheet No 10-91, "Guide to Home Owners on Foundation Maintenance and Footing Performance" attached.
- 8.7 Finally, no responsibility will be taken for this report if it is altered in any way or not reproduced in full.

This report consists of 8 pages and one site plan.

Alternative System to Give a
Bracing Resistance of 4 kN/m

Table 7. Minimum Sheathing Thickness of Plywood (mm)

Plywood Stress Grade	Stud Spacing	
	450mm	600mm
F8	7	9
F11	6	7
F14	4	6
F27	4	4.5

For the system with the plywood thicknesses and stud spacings given in Table 7 and fastener spacings given in Figure 5, NO BOLTS, NO NOGGING, NO OTHER BRACING, the allowable design racking load is:

4.0 kN/m

Figure 5. Fastener Diagram for Table 7

Fasteners

The approved fasteners used to connect the structural plywood to the frame are specified in Table 3.

Table 3. Minimum Fastener Specifications for Plywood Sheathing

Hand Driven Nails	Power Driven Nails	Power Driven Staples
2.8 - 3.15mm Dia. Diameter Clouts or Flathead Nails x 30mm Long	Senco Nail EC17 - 1½ Bostitch Nail C45D Bostitch Nail CR3D	Senco Staple G5562 - 1½ Bostitch Staple BCS1024

- Note 1. Fasteners with equivalent dimension to those in Table 3 are acceptable.
 2. The above fastener types are suitable for use with all species of timber framing.
 3. Minimum edge clearance for fasteners is 7mm.
 4. All fasteners are to be hot dipped galvanised or suitably coated.
 5. If smaller diameter hand driven nails are used then the spacings of nails can be reduced in the ratio of the basic lateral loads per nail for J4 joint group given in Table 4.2.1.1 of AS 1720 Timber Engineering Code for the lower nail diameter relative to load for a 2.8mm Dia. nail.

The structural plywood is to be fixed to the frame using the fasteners detailed in Table 3 at the centres specified in Figures 2 to 6 for each sheathing system for which allowable design racking loads are given. The fastener centres must be multiplied by 0.66 when staples are used.

4.9.6 Type B bracing unit A Type B bracing unit is based upon a design racking resistance of 4 kN. The following bracing units are deemed to be satisfactory Type B braces:

- (a) A pair of diagonal metal tension straps of minimum nominal dimension 30 mm x 0.8 mm and the minimum net section 24 mm² in opposing directions on one side of the timber frame as shown in Figure 4.14.

Metal tension straps shall be properly tensioned.

End studs shall be strapped to the top and bottom plates as shown in Figure 4.14.

NOTE: Noggings have been omitted for clarity.

John Fitzgerald Consulting Engineers

A.C.N. 006 358 489

Sheet No. 15

Job No. 131/98

Date 22.6.98

Engr. AP

Project:

Roof Beams (RB5) And (RB4)

Span: 3350 mm c/c.

Loads:

Conc:

From (RB1) DL $0.81 \times 5.50 / 2$
 LL $0.54 \times 5.50 / 2$
 WL $1.49 \times 5.50 / 2$

$$= 2.23 \text{ kN} \downarrow$$

$$= 1.49 \text{ kN} \downarrow$$

$$= 4.10 \text{ kN} \uparrow$$

$$\text{DL} \quad 2.23 \text{ kN} \downarrow$$

$$\text{DL+LL} \quad 3.72 \text{ kN} \downarrow$$

$$\text{DL+WL} \quad 2.09 \text{ kN} \uparrow \quad @ \text{Midspan.}$$

Dist D:

Roof DL $0.40 \text{ kPa} \times 2.00 / 2$
 LL $0.26 \text{ kPa} \times 2.00 / 2$
 WL $(0.3+0.6) 0.99 \text{ kPa} \times 2.00 / 2$
 Beam slw DL

$$= 0.40 \text{ kN/m} \downarrow$$

$$= 0.26 \text{ kN/m} \downarrow$$

$$= 0.99 \text{ kN/m} \uparrow$$

$$= 0.14 \text{ kN/m} \downarrow$$

$$\text{DL} \quad 0.54 \text{ kN/m} \downarrow$$

$$\text{DL+LL} \quad 0.80 \text{ kN/m} \downarrow$$

$$\text{DL+WL} \quad 0.35 \text{ kN/m} \uparrow$$

$$\begin{aligned} \text{M}_{\text{DL+LL}} &= (3.72 \times 3.35 / 4) + (0.80 \times 3.35^2 / 8) \\ &= 3.12 + 1.12 \\ &= 4.24 \text{ kNm} \end{aligned}$$

$$\text{R}_{\text{DL+LL}} = 3.20 \text{ kN} \downarrow$$

$$\text{R}_{\text{DL+WL}} = 1.63 \text{ kN} \uparrow$$

Try 240 x 45 F17 SHW

$$I_b = 4.24 \times 10^3 /$$

$$\begin{aligned} \delta_{\text{DL}} &= \left(\frac{2 \times 2.23 \times 10^3 \times 3350^3}{48 \times 14000 \times 51.84 \times 10^6} \right) + \left(\frac{2 \times 5 \times 0.54 \times 3350^4}{384 \times 14000 \times 51.84 \times 10^6} \right) \\ &= 4.81 + 2.44 = 7.25 \text{ mm} \quad (\approx \text{Span} / 462) \quad \checkmark \end{aligned}$$

Adopt 240 x 45 F17 SHW Roof Beams (RB5) And (RB4)

PROPOSED APT. AND ADDIT. TO RESIDENCE
3 PENNY LANE
MCCRAE

Sheet No: J
Job No: 131/98
Date: 10.7.98
Engr: AP.

Project:

REINFORCED MASONRY RETAINING WALLS:

$$\gamma = 20 \text{ kN/m}^3$$

$$K_a = 0.406 \quad K_p = 3.50$$

- No surcharge loading.

Max. Height of Soil Retained: 1500 mm

Wall:

$$M^* = (0.406 \times 20 \times 1.50^3 / 6) \times 1.50 = 6.85 \text{ kN.m/m}$$

For 300 Reinforced Blockwork Wall
Solid Blocks

Y12 Starter Bars @ 300 centres (Central) ($A_{st} = 367 \text{ mm}^2/\text{m}$)
d = 150 mm.

$$\therefore M_d(\text{Max}) = 0.70 \times 400 \times 367 \times 150 \left(1 - \frac{0.60 \times 400 \times 367}{(1.30 \times 5.40) \times 1000 \times 150}\right) \times 10^{-6}$$

$$= 14.12 \text{ kN.m/m} \quad \text{OK}$$

Footings:

- About Toe:

$$M_{\text{ult}} = 0.406 \times 20 \times 1.00^3 / 6 = 7.89 \text{ kN.m/m}$$

$$\text{Reqd. Resist.} = 1.28 \times 7.89 = 14.83 \text{ kN.m/m}$$

Try 900 wide x 300 Deep Footing:

AVAILABLE RESISTANCE:

Ret. Wall	DL	$23 \times 0.18 \times 1.50$	$= 6.21 \text{ kN.m}$
-----------	----	------------------------------	-----------------------

Ret. Wall	DL	$24 \times 0.12 \times 1.50$	$= 4.32 \text{ kN.m}$
-----------	----	------------------------------	-----------------------

Footing	DL	$24 \times 0.30 \times 0.90$	$= 6.48 \text{ kN.m}$
---------	----	------------------------------	-----------------------

Soil	DL	$20 \times 0.30 \times 1.50$	$= 9.00 \text{ kN.m}$
------	----	------------------------------	-----------------------

Key	DL	$24 \times 0.30 \times 0.15$	$= 1.08 \text{ kN.m}$
-----	----	------------------------------	-----------------------

$$M_{\text{Resist}} = (6.21 + 4.32) \times 0.45 + (6.48 \times 0.45) + (9.00 \times 0.75) + (1.08 \times 0.45)$$

$$= 4.74 + 2.92 + 6.75 + 0.49 = 14.90 \text{ kN.m/m} \quad \text{OK}$$

Project:

Reinforced Masonry Retaining Walls: (Contd.)

Sliding:

$$P_{\text{SLIDING}} = 0.406 \times 20 \times 1.50^2 / 2 = 9.14 \text{ kN/m}$$

Avail. Resistance:

$$P_{\text{RESIST}} = (0.45 (6.21 + 4.32 + 6.48 + 9.00 + 1.00)) + (3.50 \times 20 \times 0.45^2 / 2) \\ = 12.19 + 7.09 = 19.28 \text{ kN.}$$

$$F/S = 19.28 / 9.14 = 2.1 \checkmark \text{ ok.}$$

Max. Height of Soil Retained: 1200 mm

Footings:

- o/t About Toe:

$$M_{\text{okt}} = 0.406 \times 20 \times 1.50^3 / 6 = 4.57 \text{ kN.m/m}$$

$$\text{Reqd. Resistance} = 1.88 \times 4.57 = 8.59 \text{ kN.m/m}$$

Try 750 wide x 300 Deep Footing:

AVAILABLE RESISTANCE:

Ret. Wall	DL	$23 \times 0.12 \times 1.20$	$= 4.97 \text{ kN}$
Ret. Wall	DL	$24 \times 0.12 \times 1.20$	$= 3.46 \text{ kN}$
Footing	DL	$24 \times 0.30 \times 0.75$	$= 5.40 \text{ kN}$
Soil	DL	$20 \times 0.30 \times 1.20$	$= 7.20 \text{ kN}$
Key	DL	$24 \times 0.30 \times 0.15$	$= 1.08 \text{ kN}$

$$M_{\text{RESIST}} = ((4.97 + 3.46) \times 0.30) + (5.40 \times 0.75 / 2) + (7.20 \times 0.60) + (1.08 \times 0.30) \\ = 2.53 + 2.03 + 4.32 + 0.32 \\ = 9.20 \text{ kN.m/m} \checkmark \text{ ok.}$$

NOTES
THE OWNER, BUILDER SHALL BE RESPONSIBLE FOR ENSURING THAT ALL DIMENSIONS, LEVELS AND STRIKES ARE CORRECT, AND THAT ALL WORKS ARE CARRIED OUT IN ACCORDANCE WITH THE AUSTRALIAN STANDARDS & BUILDING CODE OF AUSTRALIA.
SOIL CLASSIFICATION: REFER SOIL REPORT FOR FOUNDING DEPTH OF FOOTINGS. THESE DRAWINGS WHERE APPLICABLE, SHALL BE READ IN CONJUNCTION WITH ENGINEERS DRAWINGS AND COMPUTATIONS.
TIMBER CONSTRUCTION TO COMPLY TO AS 1684-1999 NATIONAL TIMBER FRAMING CODE OF AUSTRALIA.
TERMINATE PROTECTION TO COMPLY WITH AS 3640.
STAMP PROOF COURSES AND FLASHINGS TO COMPLY WITH AS 2904.
SURFLOOR VENTILATION OF 7500mm PER METRE RUN OF EXTERNAL WALL.
GALLY WALL TIES AT MAX 600mm C/S IN EACH DIRECTION AND WITHIN 300mm OF CONTROL JOISTS AND OPENINGS.
GLAZING TO COMPLY WITH AS 1288.
ALL WET AREAS TO COMPLY WITH PART F1.7 OF THE BUILDING CODE OF AUSTRALIA.
ALL STEEL WORK, WALL TIES, LIMITS ETC THAT ARE EMBEDDED OR FIRED INTO MASONRY SHALL BE PROTECTED IN ACCORDANCE WITH AS-1630 OR AS-3700-1988 TABLE 22, HOT DIPPED GALVANIZED STAINLESS STEEL OR CADMIUM COATED.
ALL STORMWATER AND SEWER TO BE IN ACCORDANCE WITH RELEVANT AUTHORITY.
ALL BRACING AND TIE DOWNS MUST BE IN ACCORDANCE WITH AS-1684-1999.
Ⓢ DENOTES SMOKE DETECTOR, TO BE INSTALLED IN ACCORDANCE WITH AS-1786, HARDWIRED TO NEW DWELLINGS AND BATTERY TYPE TO ADDITIONS.
CONCRETE WORKMANSHIP AND MATERIALS SHALL BE IN ACCORDANCE WITH AS-2870 AND AS-3600.
INSULATION:
ROOF TOTAL R2.2
REFLECTIVE FOIL LAMINATE OVER ROOF BATTENS, 20mm AIR GAP BETWEEN RFL AND INSULATION, BULK INSULATION MINIMUM BATHING 8.2.0
WALLS TOTAL R 1.7
THREE FLOOR FLOORWALK 8.1.5 BULK INSULATION BETWEEN EXTERNAL STUCCO.
CONCRETE FLOOR PROVIDE TOTAL 8.1.3 INSULATION (RFL) BENEATH EXTERNAL STUCCO.
NOTE IF THE DWELLING IS IN A BUSHFIRE PRONE AREA, WORKS SHALL BE CONSTRUCTED IN COMPLIANCE WITH AS 2959-1999 CONSTRUCTION OF BUILDINGS IN BUSHFIRE PRONE AREAS.
HANDRAIL HEIGHT MINIMUM 1000mm FOR DECKS WHICH ARE 1m OR MORE ABOVE FINISHED GROUND LEVEL. MAXIMUM SPACING BETWEEN RAILS 125mm. FOR DECK HEIGHT WHICH ARE 4m OR MORE ABOVE FINISHED GROUND LEVEL, THE HANDRAIL SHALL BE NON CLIMBABLE BETWEEN THE HEIGHTS OF 1500mm AND 750mm.
DOORS TO W.C.'S WHERE THE DOOR SWING IS WITHIN 1.2m OF THE CLOSET PAN THE DOOR SHALL HAVE LEFT OFF HINGES.

MORNINGTON PENINSULA Shire Council
RECEIVED
MAIN FILE
OFFICERS

Dear Sir

RE: 3 PENNY LANE, MCCRAE - BA 981848

I refer to your submission of amended plans received on 14/3/03 detailing the proposed amendments to the dwelling and the submission of the survey undertaken by Watson P/L and received on 18/3/03 for the above site and advise as follows.

I am willing to issue a new building permit for the building work still to be undertaken being-

1. Framing items

- Bearer ends and joins to be supported in the store & steps
- Tie top plates to studs/studs to sub-floor
- Provide tie downs to RB2/RB4 & RB5 as per engineering computations (page B)
- Nail ply bracing @ 50 mm centres top & bottom
- Amend all plans to show wall and window positions (submitted 24/2/03)
- Block under studs RB1 & RB2

2. Building work

- Completion of the timber decking adjacent to the entry, bedroom and retreat

3.

- Submission of the computations for the glazed balustrading including computations, from the manufacturer
- It would appear that the columns known as DC3 & DC5 exceed the design length of 6.9 metres considerably and amended engineering computations (with Form 13) will need to be submitted confirming their adequacy prior to the issue of the Occupancy permit

HAND DELIVERED MAIL

- 1 APR 2003 Plw

The existing roofed area over the decking adjacent to the living room cannot be issued with a building permit as the work has been completed. You must expose all framing members and connections to enable inspection to be undertaken to ensure that compliance with the submitted engineering drawings is achieved.

Furthermore, from the survey submitted it is evident that portion of the entry stairs and retaining wall (masonry) have been constructed on the adjoining allotment. You are required to submit amended plans detailing the removal of all structures over the title boundary and proposed new replacement structures. The existing timber sleeper retaining wall may remain on the adjoining property provided written consent is received from the owner of the allotment agreeing to the current siting.

in regard to this matter please do not hesitate to contact me on

FBT Declaration

I, behalf of Mornington Peninsula Shire Council declare that the expense payment benefits, described above, and provided during the FBT year from 1 April 2000 to 31 March 2001 are payments or reimbursements of expenses which, under the 'otherwise deductible' rule, would have taxable value of nil.

FYI	

Dear Sir, Madam,

3 Penny Lane McCrae
Mornington Shire Council
Restump of detached dwelling As per plans

In accordance with Section 80 of the Building Act 1993, we advise that Marie J. Walker has recently been appointed as the relevant building surveyor for the above project.

If you have any queries, do not hesitate to contact Marie J. Walker.

Yours faithfully,

Personal Information

Protection of Sleeping Areas

The regulations require that a smoke alarm be located 'between each area containing bedrooms and the remainder of the dwelling'.

In most dwellings it is common to find the bedroom located in one area and connected by a general hallway. In this instance the alarm should be located as depicted in Diagram 1.

DIAGRAM 1 - SMOKE ALARMS IN HALLWAYS

Located on ceiling between sleeping area and remainder of dwelling

If the bedrooms are not grouped in a common area or no connecting hallway exists, then an alarm should be located within 1.5m of the entrance to each bedroom as depicted in Diagram 2.

DIAGRAM 2 - DWELLING WITH SEPERATE SLEEPING AREAS

NOTE: Self contained smoke alarms must be located on or near the ceiling.
Smoke alarms not to be located within 300mm of the ceiling/wall junction.
Smoke detectors to be supplied and installed in accordance with AS 3786.

TERMITE PROTECTION:

FOOTING DETAILS

100mm x 100mm Concrete Reinforced Stumps
300mm x 300mm Concrete Pad Footing - Founded at Min. 500mm.

NOTE: BUILDING INSPECTOR MAY REQUIRE FOUNDING DEPTH TO BE DEEPENED.

ALL DAMAGED AND ROTTEN TIMBERS TO BE REPLACED.

Mr Frank Dimopoulos
3 Penny Lane
MCCRAE 3938

Dear Sir / Madam,

**REQUEST FOR MINOR AMENDMENT
PLANNING PERMIT P 98/0801
3 PENNY LANE, MCCRAE**

I refer to your application for a minor amendment that was received by Council on 11 July 2002 and wish to confirm my earlier verbal advice that the relevant criteria have not been satisfied and accordingly the application cannot be approved.

I also confirm that Planning Permit P 02/2535 was issued on 17 February 2003 which effectively approves (with some variation) those matters subject to the minor amendment application.

I note that a \$100.00 application fee was paid for the minor amendment application – with \$50.00 being the applicable fee. Accordingly a \$50.00 fee refund for the overpaid amount will be forwarded to you shortly.

If you have any further questions I will be pleased to assist.

Yours faithfully

Request for minor amendment

The owner of land, or a person with the consent of the owner, may ask the Responsible Authority in writing to amend a permit which applies to the land.

Decision to amend by Responsible Authority

The Responsible Authority may amend the permit if it is satisfied that the amendment-

1. does not change the affect of any condition required by the Victorian Civil and Administrative Tribunal; and
2. does not change the effect of any condition required by a referral authority unless this acceptable to the relevant referral authority; and
3. does not adversely affect the interests of a relevant referral authority, or is acceptable to the relevant referral authority; and
4. will not cause an increase in detriment to any person; and
5. does not change the use for which the permit was issued other than a minor change to the description of the use.

What conditions can be put on permits?

The Responsible Authority may approve an amendment to any plans, drawings or other documents approved under a permit if the amendments are consistent with the planning scheme and the permit.

Note:

Only those alterations/amendments clearly stated below and coloured on 3 copies of the submitted plan will be considered as being approved in the event that an approval is given.

PLANNING PERMIT

Permit No: **P980801**

Planning Scheme: **Flinders**

Responsible Authority: **Mornington Peninsula Shire
Council**

ADDRESS OF THE LAND

3 PENNY LANE, MCCRAE

LOT 4, LP. 348585

THE PERMIT ALLOWS:

**DEVELOPMENT OF ADDITIONS AND ALTERATIONS TO AN EXISTING
DWELLING IN ACCORDANCE WITH THE ENDORSED PLANS.**

THE FOLLOWING CONDITIONS APPLY TO THIS PERMIT:

- 1 The layout of the land, the size and type of the proposed buildings and works, including the materials of construction, on the endorsed plans must not be altered or modified without the consent of the Responsible Authority.
- 2 All disturbed surfaces on the land resulting from the development must be revegetated and stabilised to the satisfaction of the Responsible Authority.
- 3 The exterior finish of the building shall be 'Beige' or 'Green' or other non-reflective and muted shades of colour approved by the Responsible Authority and then maintained to its satisfaction.
- 4 This permit will expire if one of the following applies:
 - The development is not started within two years of the date of this permit.
 - The development is not completed within four years of the date of this permit.

The Responsible Authority may extend the above periods if a request is made in writing before the permit expires or within the following three months.

Date Issued: Friday, 7 August 1998

Signature For The
Responsible Authority:

Mr Anthony Matthews, Development Planner

Personal Information

IMPORTANT INFORMATION ABOUT THIS PERMIT

WHAT HAS BEEN DECIDED?

The Responsible Authority has issued a permit.

(Note: This is not a permit granted under Division 5 of Part 4 of the Planning and Environment Act 1987.

WHEN DOES A PERMIT BEGIN?

A permit operates:

* from the date specified in the permit, or

* if no date is specified, from:

- (i) the date of the decision of the Victorian Civil and Administrative Tribunal, if the permit was issued at the direction of the Tribunal, or
- (ii) the date on which it was issued, in any other case.

WHEN DOES A PERMIT EXPIRE?

1. A permit for the development of land expires if-
 - the development or any stage of it does not start within the time specified in the permit; or
 - the development requires the certification of a plan of subdivision or consolidation under the Subdivision Act 1988 and the plan is not certified within two years of the issue of the permit, unless the permit contains a different provision; or
 - the development or any stage is not completed within the time specified in the permit, or, if no time is specified, within two years after the issue of the permit or in the case of a subdivision or consolidation within 5 years of the certification of the plan of subdivision or consolidation under the Subdivision Act 1988.
2. A permit for the use of land expires if-
 - the use does not start within the time specified in the permit, or if no time is specified, within two years after the issue of the permit, or
 - the use is discontinued for a period of two years.
3. A permit for the development and use of land expires if-
 - the development or any stage of it does not start within the time specified in the permit; or
 - the development or any stage of it is not completed within the time specified in the permit, or, if no time is specified, within two years after the issue of the permit; or
 - the use does not start within the time specified in the permit, or, if no time is specified, within two years after the completion of the development; or
 - the use is discontinued for a period of two years.
4. If a permit for the use of land or the development and use of land or relating to any of the circumstances mentioned in section 6A(2) of the Planning and Environment Act 1987, or to any combination of use, development or any of those circumstances requires the certification of a plan under the Subdivision Act 1988, unless the permit contains a different provision-
 - the use or development of any stage is to be taken to have started when the plan is certified; and
 - the permit expires if the plan is not certified within two years of the issue of the permit.
5. The expiry of a permit does not affect the validity of anything done under that permit before the expiry.

WHAT ABOUT APPEALS?

- * The person who applied for the permit may appeal against any condition in the permit unless it was granted at the direction of the Victorian Civil and Administrative Tribunal where, in which case no right of appeal exists.
- * An appeal must be lodged within 60 days after the permit was issued, unless a Notice of Decision to grant a permit has been issued previously, in which case the appeal must be lodged within 60 days after the giving of that notice.
- * An appeal is lodged with the Victorian Civil and Administrative Tribunal.
- * An appeal must be made on a Notice of Appeal form which can be obtained from the Victorian Civil and Administrative Tribunal, and be accompanied by the prescribed fee.
- * An appeal must state the grounds upon which it is based.
- * An appeal must also be served on the Responsible Authority.
- * Details about appeals and the fees payable can be obtained from the:

DELEGATE REPORT - P 980801

7 August, 1998

Dwelling additions
3 Penny Lane, McCrae

Prepared By:	Anthony Matthews - Development Planner
Planning Scheme:	Flinders - Chapter 1
Zone:	Hillside Residential
Overlay (in building area):	Coastal Policy
Applicant:	Frank Dimopoulos
Received:	24/6/98
Advertising:	Not requested

BACKGROUND

History/previous permits:

Planning Permit P 544/96 was issued on 5 July 1996 for the development additions to an existing dwelling and erection of a garage.

Existing Conditions:

27.130 m 30.48 m residential allotment with frontage of approx. 8.0 m to Penny Lane which is an unconstructed lane. The small frontage is due to the 'U'- shape of Penny Lane. The land which rises steeply towards the rear is steeply sloping and is improved by a two storey weatherboard dwelling (painted white). There are significant views of Port Phillip Bay to the north.

Adjoining properties:

North	-	Single storey brick dwelling with short axis facing north. (607 Point Nepean Road)
South	-	Two storey brick dwelling sited well behind and well above the level of the subject dwelling. This house cannot be seen from the subject site.
North-east	-	Two storey cement sheet weatherboard dwelling which is sited approx. in line with the dwelling on the subject land on a steeply sloping block. (605 Point Nepean Road)

PROPOSAL

To make additions to the dwelling to provide for: a sunroom and deck above the existing dining room and kitchen (which will be a second story); a large deck on the north side of the dwelling opposite the dining/living room; new laundry, toilet and bathroom on the south side of the building; part of the existing dwelling to be demolished and to be re-built to provide for a retreat and master bedroom/ensuite.

Materials: 'Green' or 'Beige' Colorbond roof and weatherboard walls in 'Beige' tones

Heights: 7.7 m max. wall height and 8.0 m max. overall height

Setbacks: 1.5 m from west (side) boundary

Works: Existing site cut.

The application requires approval pursuant to the provisions of the Coastal Policy (Clause 5.05 which requires planning approval for all buildings and works. In addition, a variation is being sought to the 5.5 m max. wall height (specified for both new houses or additions to houses) in the zone pursuant to Clause 4.01(3) and to vary the (west) side boundary setback from 2.2 m to 1.5 m pursuant to Clause 4.01(2)(c). A permit may be granted to vary either or both of these requirements subject to compliance with Clause 4.01(4).

CONSIDERATION

It is considered to be reasonable (and does not require advertising) as:

- the additions/alterations are designed to compliment and enhance the appearance of the existing dwelling;
- the additions/alterations are to be of approved materials and colour finishes;
- there is sufficient separation between the dwelling and surrounding dwellings to ensure that there should be no direct overlooking/loss of privacy or shadowing resulting from the development;
- it should have no significant impact on the views currently enjoyed to and from the area (beyond that which exists with the existing dwelling) particularly given the topography of the area and the surrounding vegetation;
- it is likely to significantly enhance the appearance of the building;
- it should not result in material detriment for any person

RECOMMENDATION

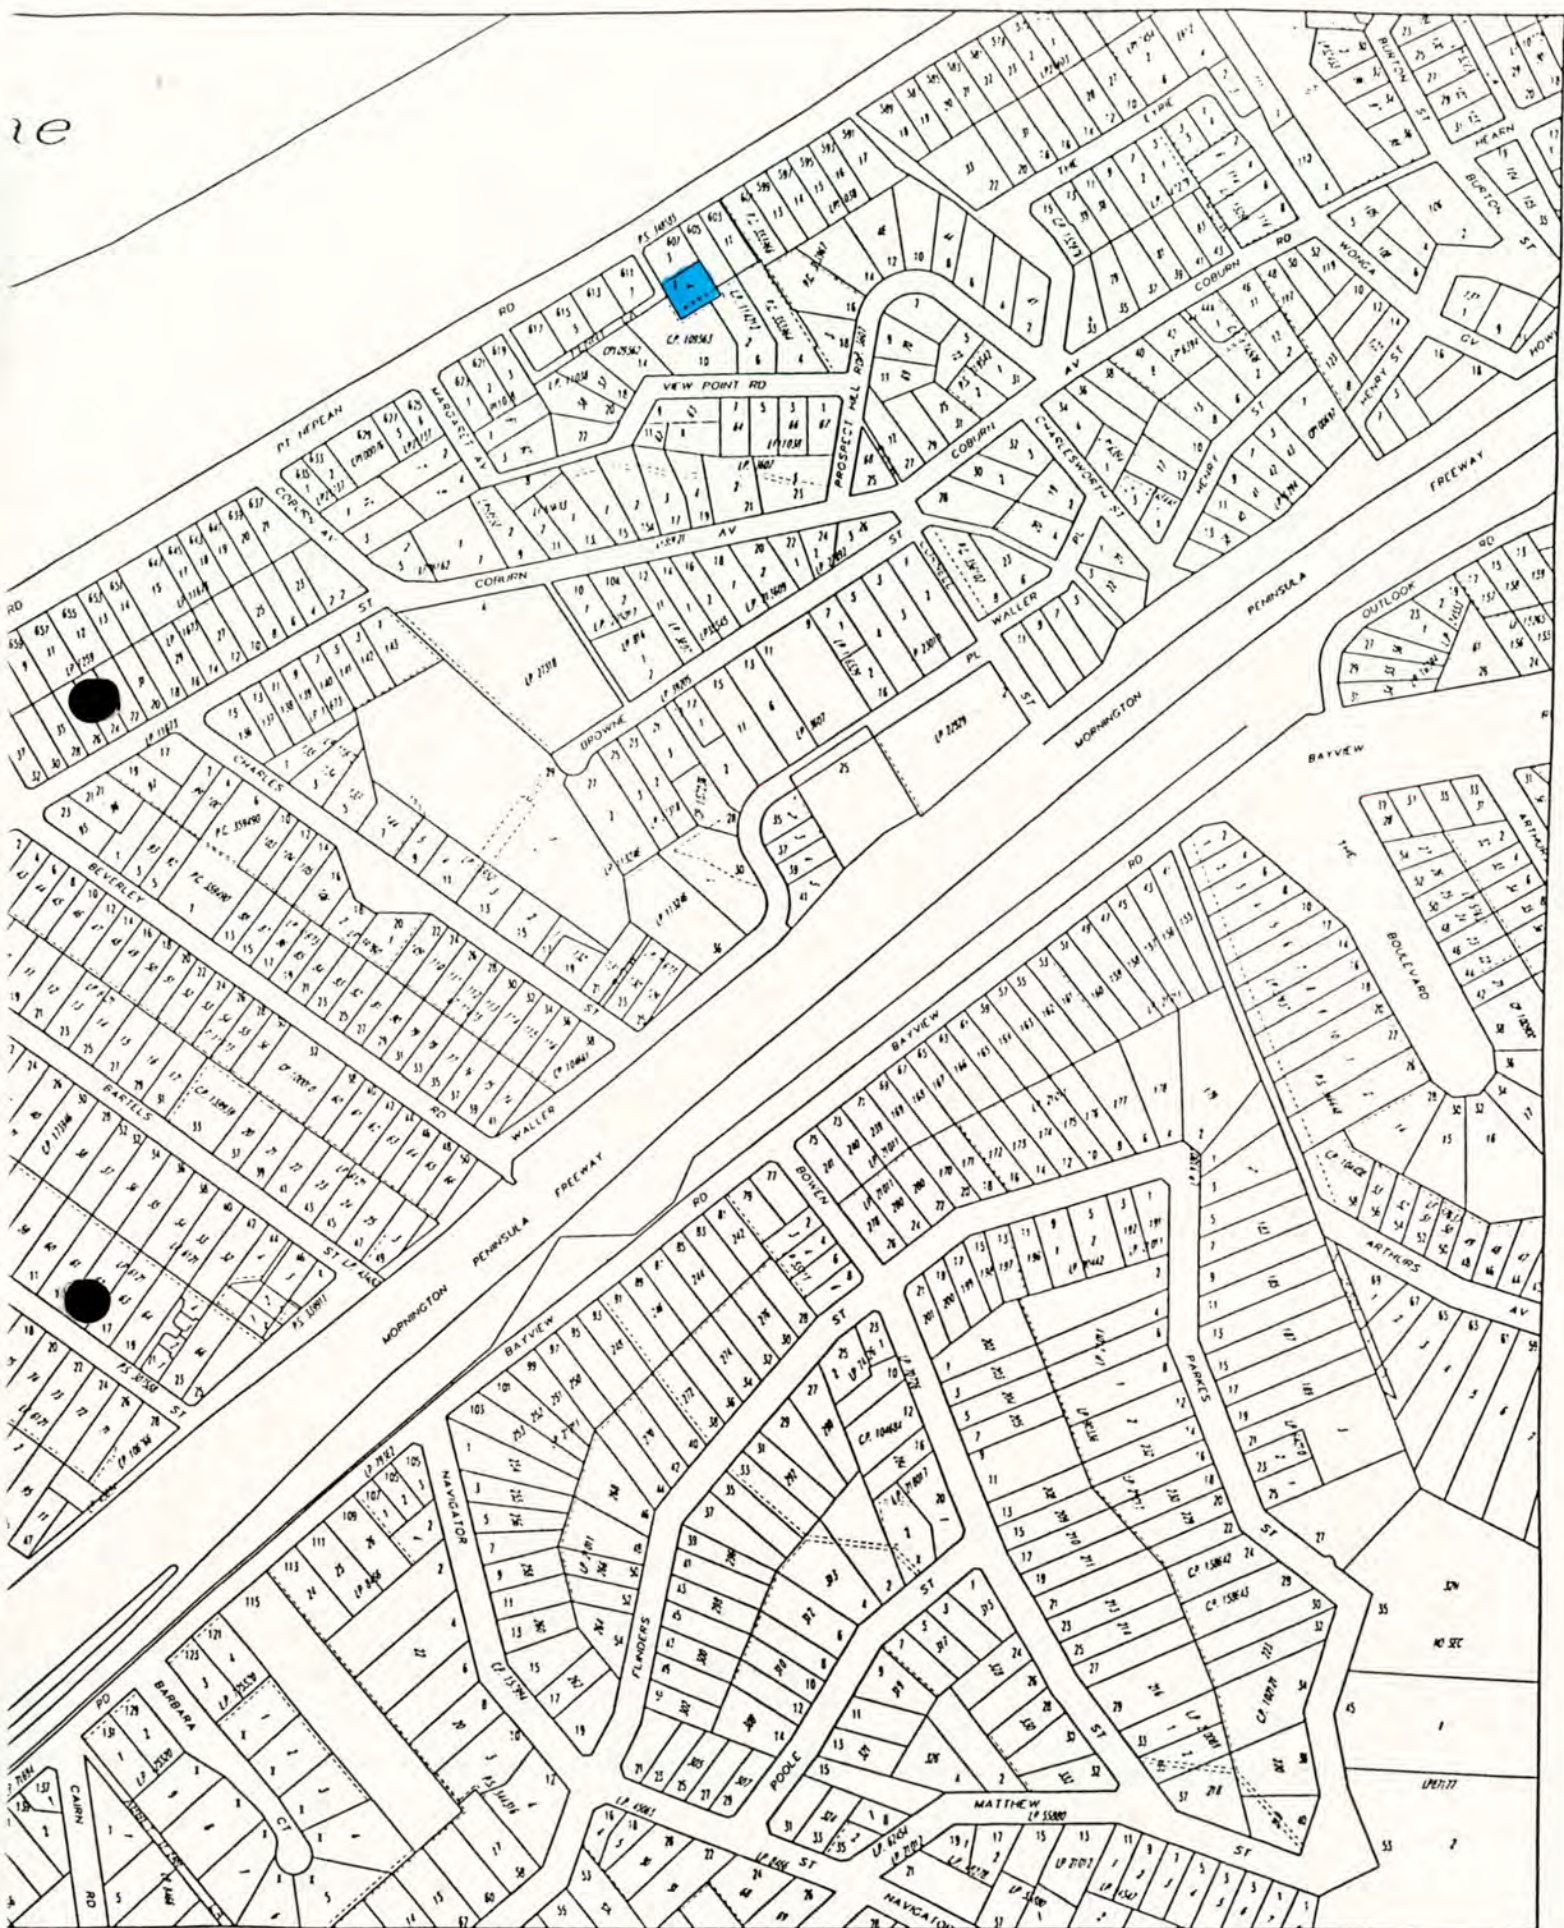

That the application be approved and planning permit P 980801 issued subject to the stated conditions.

Personal Information

HOW TO APPLY FOR A PLANNING PERMIT

Applications must include the information required by Regulation 12 of the Planning and Environment Regulations 1988. This Application for Planning Permit is provided to assist applicants.

YOU MUST GIVE FULL DETAILS of your proposal and attach as many supporting documents as possible. If you do not give enough detail or give suitable description of the proposal, you will be asked for more information. This WILL DELAY your application.

- **THE APPLICANT**
 - Give your full name or the name of the company.
 - Give your full postal address and your contact phone number.
- **THE LAND**
 - Give the street number, street name, town and postcode, the Lot Number and Lodged Plan Number or other Title particulars.
- **THE OWNER**
 - Complete this section if the applicant is not the owner otherwise indicate "Applicant".
- **THE PROPOSAL**
 - Describe fully what you want to do with the land. The application must include a plain English description of the proposal which clearly conveys the nature of the proposal. This will be used in any notice about the application. Attach additional information if there is sufficient room.
 - Attach a plan to show details of the proposed development.
 - Briefly describe the current use of the land and any buildings.
- **THE COST OF THE DEVELOPMENT**
 - If a permit is required to develop land, you must give the estimated cost of the development. This is used to assess the amount of any fee you may have to pay.
 - Development here refers to the buildings and works you intend to construct on the land. If no buildings or works are proposed and you only intend to change the use in an existing building or on the land, the work 'NIL' should be written in this square.
 - The Responsible Authority will tell you the fee you have to pay.

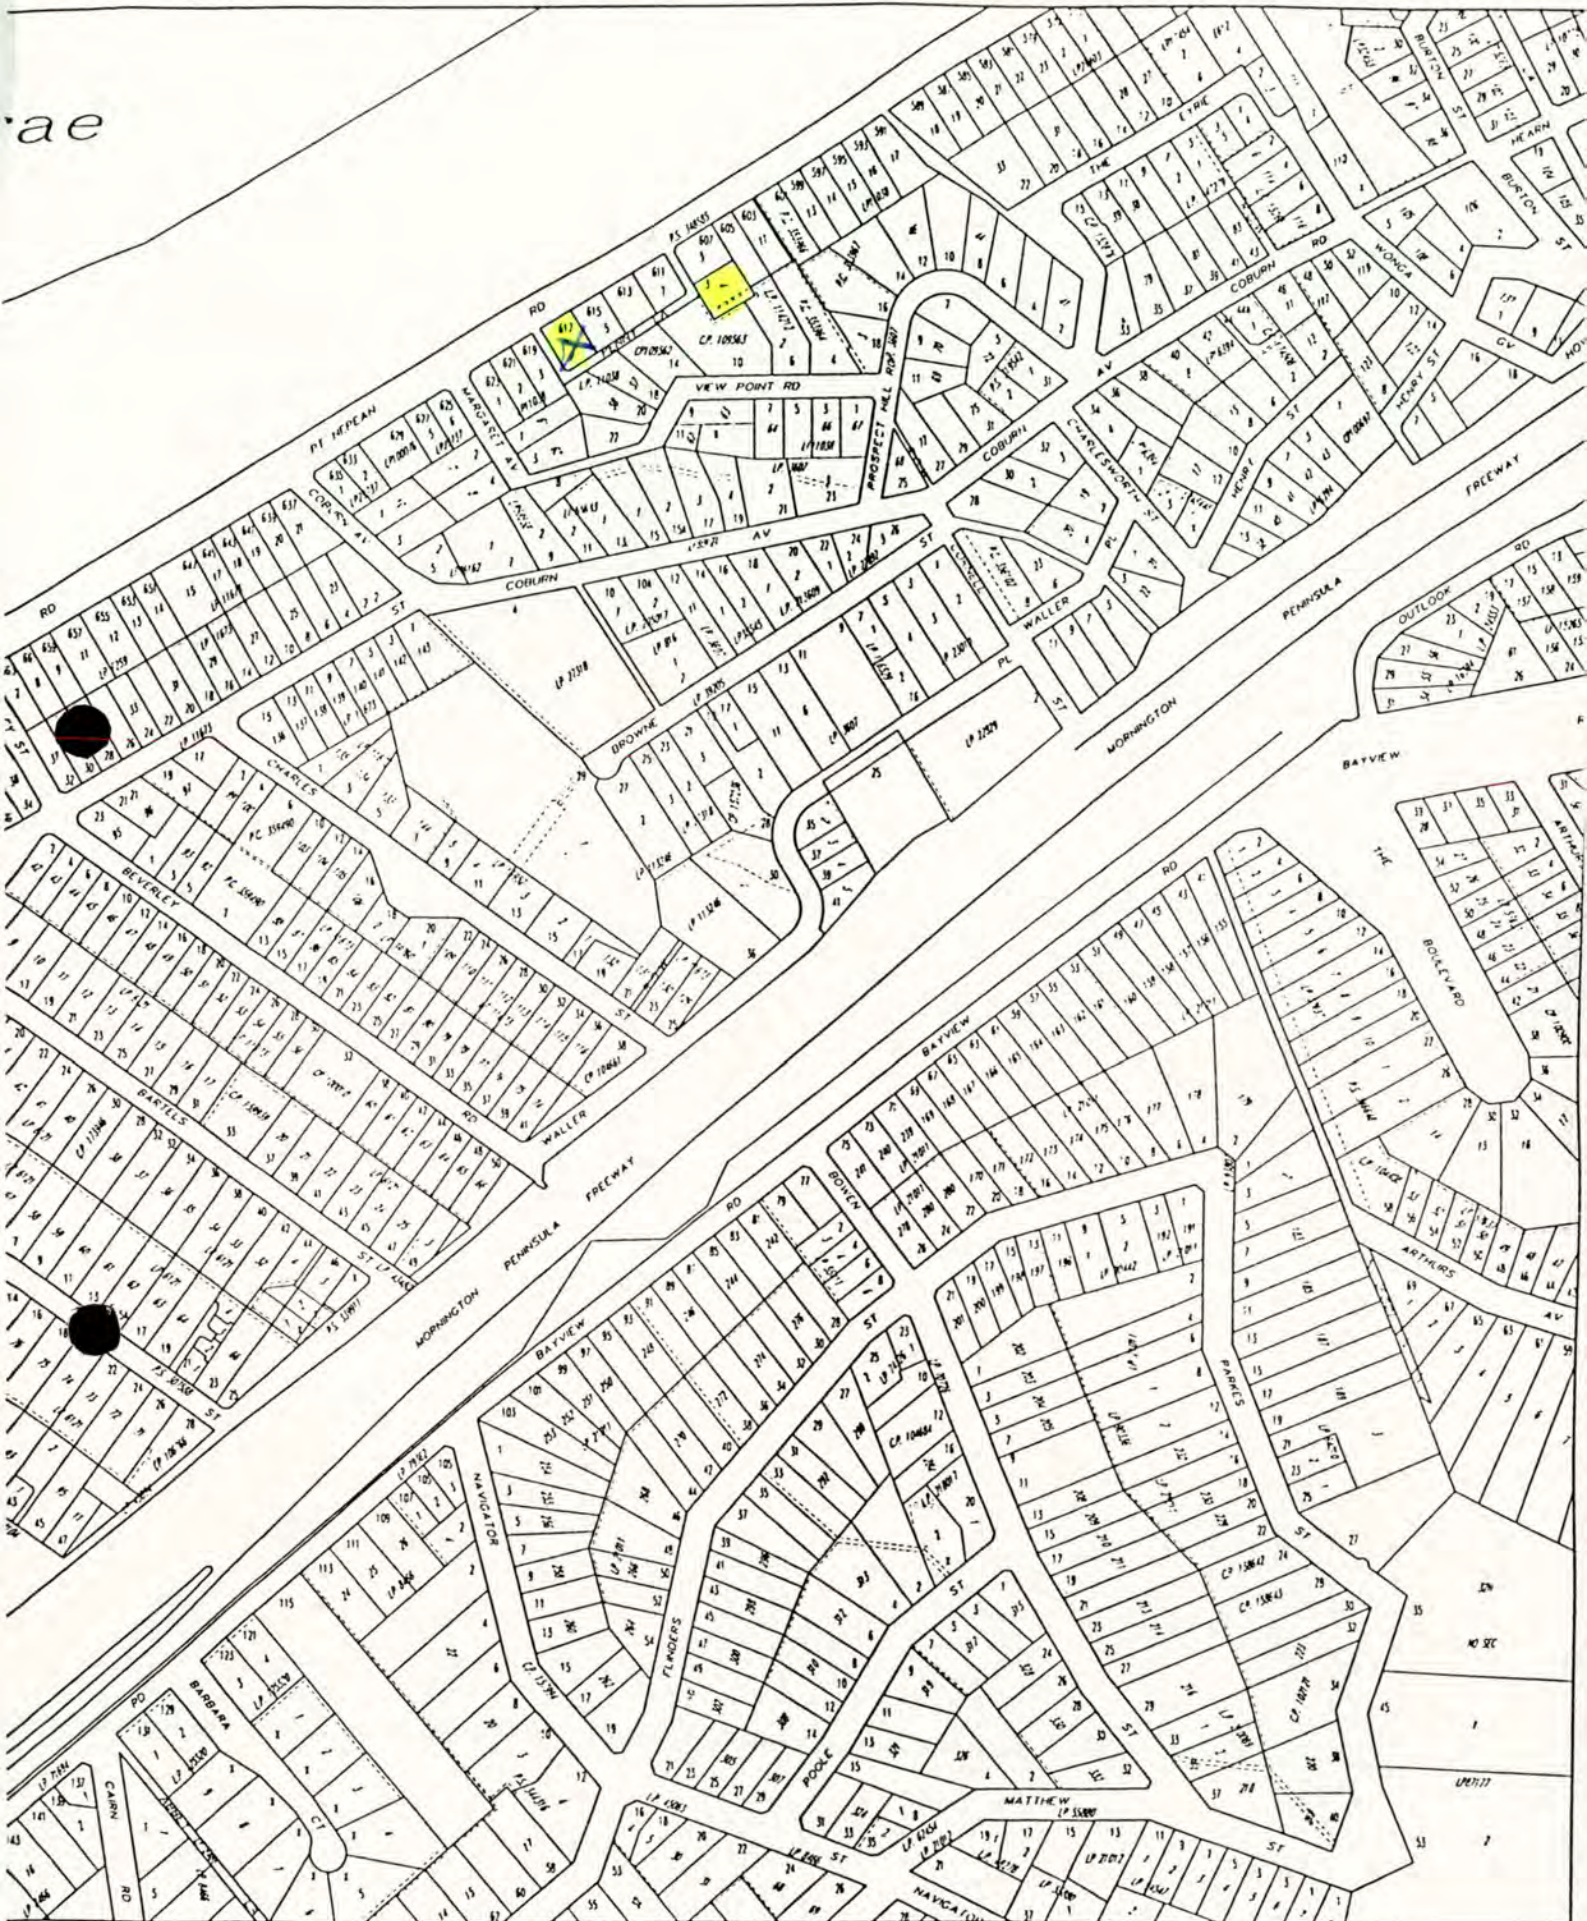

HAVE YOU:

- * Answered all the questions?
- * Included payment to cover the application fee?
- * Attached all the maps, plans, photographs and other documents?
- * Included a list of all the documents?
- * The Responsible Authority will tell you how many copies of each document is necessary.

REMEMBER it is against the Law to give false or misleading information. You may receive a heavy fine and your permit may be cancelled.

Send the completed form and all the documents to the Responsible Authority:
Mornington Peninsula Shire Council, Private Bag 1000, ROSEBUD 3939.

**PLANNING
PERMIT**

Permit No: P 544/96
Planning Scheme: Flinders
Responsible Authority: Mornington Peninsula Shire
Council

ADDRESS OF THE LAND:

NO. 3 (LOT 2, PS 310930) PENNY LANE, MC CRAE

THE PERMIT ALLOWS:

THE USE AND DEVELOPMENT FOR THE PURPOSE OF RENOVATIONS AND ADDITIONS TO THE EXISTING DWELLING AND THE ERECTION OF A GARAGE IN ACCORDANCE WITH THE DETAILS SUBMITTED WITH THE APPLICATION

THE FOLLOWING CONDITIONS APPLY TO THIS PERMIT:

1. The layout of the site and the size and type of the proposed renovations and additions to the existing and the erection of a garage, including the materials of construction, as shown on the endorsed plan shall not be altered or modified, unless in accordance with this permit, without the consent in writing of the Responsible Authority.
2. All external cladding and trim of the proposed additions and garage shall be of a non-reflective nature. Cladding materials shall be coloured or painted in muted shades of green, brown, beige or other colours approved in writing by the Responsible Authority. (All paintwork shall be maintained to the satisfaction of the Responsible Authority).
3. No native tree or shrub other than on land required for the dwelling alterations and additions and the erection of a garage authorised by this permit, its surrounds, ancillary buildings, an access driveway, or in compliance with a lawful requirement in writing by a public authority acting under any Act, shall be felled, lopped, topped, ringbarked or otherwise destroyed or removed, except with the further written approval of the Responsible Authority.

Date Issued:

5/7/96

Signature For The
Responsible Authority:
John Castle, Development I

Personal Information

IMPORTANT INFORMATION ABOUT THIS NOTICE

WHAT HAS BEEN DECIDED?

The Responsible Authority has issued a permit.

WHEN DOES A PERMIT BEGIN?

A permit operates:

- * from the date specified in the permit, or
- * if no date is specified, from :
 - (i) the date of the decision of the Administrative Appeals Tribunal, if the permit was issued at the direction of the Tribunal, or
 - (ii) the date on which it was issued, in any other case.

WHEN DOES A PERMIT EXPIRE?

1. A permit for the development of land expires if-
 - * the development or any stage of it does not start within the time specified in the permit, or
 - * the development requires the certification of a plan of subdivision or consolidation under the *Subdivision Act 1988* and the plan is not certified within two years of the issue of the permit, unless the permit contains a different provision; or
 - * the development or any stage is not completed within the time specified in the permit, or, if no time is specified, within two years after the issue of the permit or in the case of a subdivision or consolidation within 5 years of the certification of the plan of subdivision or consolidation under the *Subdivision Act 1988*.
2. A permit for the use of land expires if-
 - * the use does not start within the time specified in the permit, or if no time is specified, within two years after the issue of the permit, or
 - * the use is discontinued for a period of two years.
3. A permit for the development and use of land expires if-
 - * the development or any stage of it does not start within the time specified in the permit; or
 - * the development or any stage of it is not completed within the time specified in the permit, or if no time is specified, within two years after the issue of the permit; or
 - * the use does not start within the time specified in the permit, or, if no time is specified, within two years after the completion of the development, or
 - * the use is discontinued for a period of two years.
4. If a permit for the use of land or the development and use of land or relating to any of the circumstances mentioned in section 6A(2) of the *Planning and Environment Act 1987*, or to any combination of use, development or any of those circumstances requires the certification of a plan under the *Subdivision Act 1988*, unless the permit contains a different provision -
 - * the use or development of any stage is to be taken to have started when the plan is certified; and
 - * the permit expires if the plan is not certified within two years of the issue of the permit.
5. The expiry of a permit does not affect the validity of anything done under that permit before the expiry.

WHAT ABOUT APPEALS?

- * The person who applied for the permit may appeal against any condition in the permit unless it was granted at the direction of the Administrative Appeals Tribunal where, in which case no right of appeal exists.
- * An appeal must be lodged within 60 days after the permit was issued, unless a Notice of Decision to grant a permit has been issued previously, in which case the appeal must be lodged within 60 days after the giving of that notice.
- * An appeal is lodged with the Administrative Appeals Tribunal.
- * An appeal must be made on a Notice of Appeal form which can be obtained from the Administrative Appeals Tribunal, and be accompanied by the prescribed fee.
- * An appeal must state the grounds upon which it is based.
- * An appeal must also be served on the Responsible Authority.
- * Details about appeals and the fees payable can be obtained from the Administrative Appeals Tribunal.

DELEGATE REPORT - P 544/96

July 3, 1996

Proposal: RENOVATIONS AND ADDITIONS TO
AN EXISTING DWELLING
Address NO. 3 (LOT 2, PS 310930) PENNY LANE,
MC CRAE
Prepared By: J Castle
Planning Scheme: ROSEBUD
Applicant:
Zone:
Date Received:
Advertising Requested:
Advertising Completed:

This application seeks to undertake extensive renovations involving the additions and renovations to an existing two storey dwelling on this lot.

Pursuant to the Flinders Planning Scheme the subject land is in a Hillside Residential Zone with a Coastal Policy overlay wherein any buildings and works require approval.

The development application submitted indicates extensive alterations and additions to the existing building to modernise the appearance with new windows, exterior clad and colorbond roofing.

It is also proposed that the first floor will be extended in a northerly direction to increase the living /meals area and provide for a new kitchen.

Currently there is a small bedroom balcony existing as a second storey at the southern end of the building, such area is located above the existing basement and storage area, an addition is to be placed above this providing for a new bedroom, ensuite and walk in robe.

This area of the redevelopment gives the appearance of a third storey level which is prohibited by the Scheme. An assessment of the development shows the proposed extension to this level is to be developed above a storeroom basement which is not considered to be a level within the building concept therefore in taking this into account the proposed additions are considered to be only an extension to the second floor level.

No vegetation is to be removed from the site for this redevelopment as all extensions and alterations are to be confined to the existing development envelope.

It is also proposed that a large two car garage will be constructed at the entry to Penny Lane, such building to be clad in brickwork with a colorbond roof to match.

Overall it is considered that the proposed redevelopment of this site to be consistent to the Scheme's provisions and as the development is primarily upgrading the existing building on the land it is considered that no material detriment would suffered by adjoining residents.

It should be noted that a new house has been erected on the corner of Penny Lane and the Nepean Highway, this building being sited on a lot which has recently been excised from the old parent lot. It is considered that while this dwelling will suffer some overlooking due to the height of the building, this feature will not be exaggerated in the current circumstances as the occupants of the existing dwelling currently overlook existing properties along the Highway frontage.

It is believed that the overall redevelopment and additions is consistent with the planning objectives of the Zone and it is recommended that a permit be granted with conditions.

Recommendation: That P 544/96 be approved and issued with planning permit conditions.:

HOW TO APPLY FOR A PLANNING PERMIT

Applications must include the information required by Regulation 12 of the Planning and Environment Act 1988. This Application for Planning Permit is provided to assist applicants.

MUST GIVE FULL DETAILS of your proposal and attach as many supporting documents as possible. If you do not give enough detail or give suitable description of the proposal, you will be asked for more information. This **WILL DELAY** your application.

• THE APPLICANT

- Give your full name or the name of the company.
- Give your full postal address and your contact phone number.

• THE LAND

- Give the street number, street name, town and postcode, and the lot number and lodged plan number or other Title particulars
- If you attach a plan, include:
 - the boundaries of the land and their measurements
 - the street it faces, the nearest intersecting street, the distance from this street and the name of all streets on the plan
 - the direction of north and the scale of the plan

• THE OWNER

- Complete this section if the applicant is not the owner; otherwise indicate "applicant".

• THE PROPOSAL

- Describe fully what you want to do with the land. The application must include a plain English description of the proposal which clearly conveys the nature of the proposal. This will be used in any notice about the application. Attach additional information if there is insufficient room.
- Attach a plan to show details of the proposed development.
- Briefly describe the current use of the land and any buildings.

• THE COST OF THE DEVELOPMENT

- If a permit is required to develop land, you must give the estimated cost of the development. This is used to assess the amount of any fee you may have to pay.
- Development here refers to the buildings and works you intend to construct on the land. If no building or works are proposed any you only intend to change the use in an existing building or on the land, the word 'NIL' should be written in this square.
- The Responsible Authority will tell you the fee you have to pay.

HAVE YOU:

- Answered all the questions?
- included payment to cover the application fee, if required?
- attached all the maps, plans, photographs and other documents?
- included a list of all the documents?
- The Responsible Authority will tell you how many copies of each document it needs.

MEMBER it is against the law to give false or misleading information. You may receive a heavy fine and your permit may be cancelled.

Send the completed form and all the documents to the Responsible Authority:

Notice of Acquisition of an Interest in Land

Section 15(2) and (3) of the *Land Tax Act 1958* and Regulation 11 of the *Land Tax Regulations 1988* together require every person who acquires any land in Victoria to give notice to the Registrar of Titles in the prescribed form containing the prescribed particulars within one month of the acquisition of that land.

As from 1 July 1993 a Notice of Acquisition must be lodged with the Registrar of Titles instead of the Commissioner of Land Tax and the lodgement of a separate Notice of Disposition for land tax purposes is not required (due to the revoking of Regulation 12 and Schedule C and the amendment of Regulation 11 of the *Land Tax Regulations 1988*).
