Hi Leesa,

This email is to seek your agreement for PSM to engage external suppliers for the provision and installation of a survey monitoring system at McCrae. This is in addition to the current radar that is deployed. The intent is to use the radar for the short term and replace that system with a longer term monitoring system when appropriate.

We have sought two quotes from experienced suppliers. Based on the proposals received, we propose to engage DioSpatial. I've attached their current proposal (Rev 1), please note they are in the process of updating this proposal to include GPS monitoring.

The total fee estimate is **CIC** | to **CIC** (with GPS included at approx. **CIC**).

The fee estimate:

- * Provides monitoring for a period of 12 months. For monitoring beyond 12 months there would be additional fees dependent on the scope/amount of monitoring (approx. **CIC** per year).
- * Allows for provision of factual data only. Interpretation and reporting would be undertaken separately by PSM.
- * The above amount allows for external disbursements only. PSM fees are additional to this.

Due to the scale of the order, we would need written confirmation to proceed prior to PSM issuing a purchase order and mobilisation of the equipment.

Kind Regards

Andrew Wilson

Associate Geotechnical Engineer
