Hi Emily

When we got home, it was already worse and I've attached a couple of videos.

In a separate email, I'll send you more videos, including one of a new 'sink hole' forming outside 3 Waller Place, around the corner. If you listen to the video, you can hear the water gushing in the drain.

I also contacted South East Water their reference #1290137, I'm not sure they intend to do anything.

Thank you for all your assistance this morning, let's hope this is resolved soon.

Regards

PI
