Apologies regarding year.
Should be November 2024 not 2025.

Regards

Attached are a few videos/photos which may help with your inquiry.

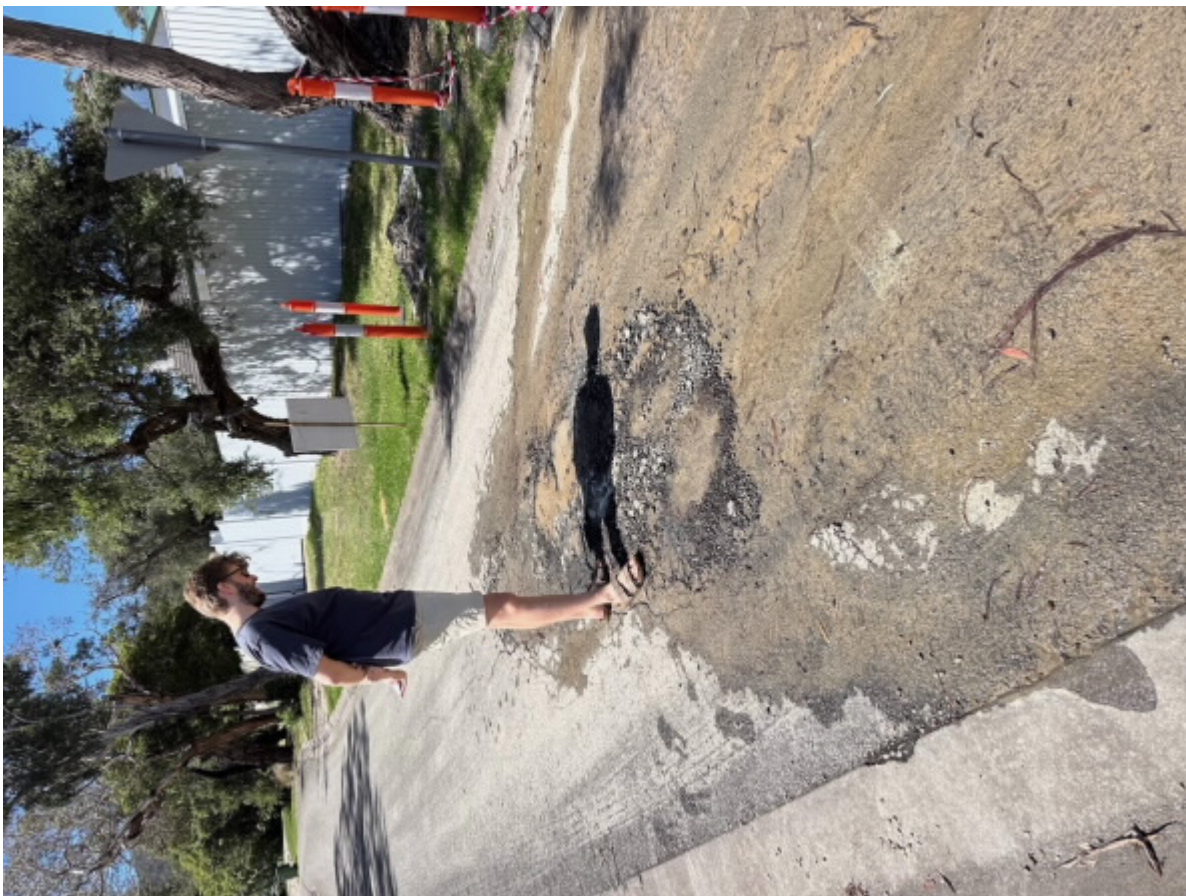

The water in the middle of the road became visible mid November 2025 outside 3 Charlesworth Street, McCrae.

Notwithstanding it had been quite dry, the flow and impacted area became progressively larger and I reported via Snap, Send and Solve on 24 November 2025.

SE Water responded on the same day requesting further information as they had no assets in the location. Other residents of the street then contacted SE Water and Council directly and provided further information.

Hopefully this helps with your enquiry. Feel free to contact me if that would help

Regards Philip Johnson
