Subject: McCrae Landslip Rainfall Data

Dear Sir/Madam,

I read with interest the comments from the inquiry at McCrae and noted the comments about rainfall prior to the landslip event.

I am resident at Irrelevant and Sensitive Dromana, which is on the bech-side of the freeway and on the downslope of Arthur's Seat about 1km from the landslip area. I have been collecting actual rainfall data at our property since April 2023 and have attached my file recording this data for information of the Panel.

Regards

Ron Mason
